

Smart Tension (Up to 100 Level)

BLE 4.0

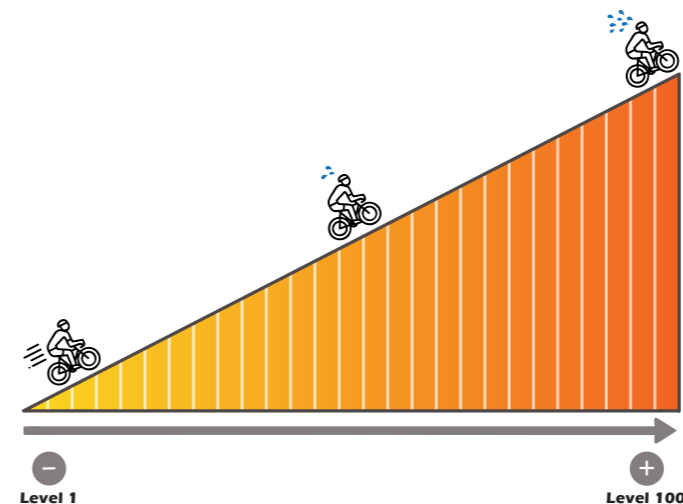

First and only smart tension is here! While training, knowing resistance level is a must to avoid injuries and making improvements. Smart tension is easily mounted on any equipment such as spinner bikes, fitness bikes, and stationary bikes. Using smart tension every resistance level can be shown on any consoles.

Smart tension is APP friendly, including build-in BLE protocol for pairing with any APP. Shows the intensity level and wattage, allowing the users to know their training conditions. With flexible resistance level from 1 to 100 levels, riding indoor can still feel the up and downhill smoothly, just like the outdoor.

High-Precision Wattage

With its flexible adjustment, this invention can have from 1 to 100 level. Moreover, it can connect with any device that have BLE protocol. You can easily examine your training situation and find your best exercise way to enhance your body.

Flexible Resistance Level

Power output has become more and more important for the athlete. It gives you the instantaneous feedback every time you exerted directly. In spinning bikes, for example, the resistance is turned up to give the same feeling as riding up a hill, and it can be turned down for the feeling of traveling down a hill.

APPs

FUNCTIONS

- Flexible intensity level (1~100)
- BLE communication
- Very low power consumption
- Battery AAA x2
- Emergency Button (Extension)
